

PSi TECHNOLOGIES TO EXHIBIT IN ELECTRONICA 2002 IN MUNICH, GERMANY

MANILA, PHILIPPINES and STA. CLARA, CALIFORNIA, October 11, 2002-PSi Technologies (NASDAQ:PSIT), a leading independent provider of power semiconductor assembly and test services, is scheduled to exhibit in the Electronica 2002 Trade Exhibit on November 12 to 15, at the New Munich Trade Fair Center, in Munich Germany.

Electronica 2002, with over 160,000 m² of exhibition space, “presents the largest range of electronic components and application-oriented assemblies anywhere in the world. Last year, 3050 exhibitors and 591 additionally represented organizations showed their wares, 54% of them from outside Germany.”

PSi’s participation in Electronica 2002 allows the company to present and discuss the latest power semiconductor package designs and services to new and existing customers.

PSi Technologies’ booth is located at Hall A6 Stand 362.

About PSi Technologies

PSi Technologies is a focused independent semiconductor assembly and test service provider to the power semiconductor market. The Company provides comprehensive package design, assembly and test services for power semiconductors used in telecommunications and networking systems, computers and computer peripherals, consumer electronics, electronic office equipment, automotive systems and industrial products. Their customers include most of the major power semiconductor manufacturers in the world such as Philips Semiconductor, ON Semiconductor, Texas Instruments, Fairchild Semiconductor, ST Microelectronics, and Infineon Technologies.
